

INTRODUCTION TO AMAZON WEB SERVICES

Summary by Damian Ndunda © July 2021

TABLE OF CONTENTS

INTRODUCTION TO AMAZON WEB SERVICES.....	1
TABLE OF CONTENTS.....	2
FOREWORD.....	21
INTRODUCTION.....	22
AWS DATA CENTER LOCATIONS.....	23
WHAT IS “CLOUD COMPUTING”?	23
AMAZON AND CLOUD COMPUTING	25
CLOUD SERVICE LAYERS DIAGRAM	26
CLOUD SERVICE MODEL COMPARISON DIAGRAM	27
HOW YOU CAN BENEFIT FROM USING AWS.....	28
THE DIFFERENCES THAT DISTINGUISH AWS	28
Flexible	28
Cost-Effective	29
Scalable and Elastic	29
Secure.....	30
Physical security.....	30
Secure services.....	30
Data privacy.	30
Experienced.....	30
HOW MUCH DOES IT COST?	31
FREE TIER.....	31

BILLING.....	33
• Based on hours of usage	33
• Based on traffic	33
• Based on storage usage	33
Pay-per-use opportunities	33
AWS GLOBAL INFRASTRUCTURE PICTURE	34
AWS COMPUTING PLATFORM DIAGRAM	35
CHAPTER - AMAZON WEB SERVICES CLOUD PLATFORM	37
COMPUTE & NETWORKING	37
Amazon Elastic Compute Cloud (Amazon EC2).....	37
Auto Scaling.....	38
Elastic Load Balancing	38
Amazon WorkSpaces	38
Amazon Virtual Private Cloud (Amazon VPC)	39
Amazon Route 53.....	39
AWS Direct Connect.....	39
STORAGE & CONTENT DELIVERY NETWORK.....	40
Amazon Simple Storage Service (Amazon S3)	40
Amazon Glacier	40
Amazon Elastic Block Storage (EBS)	41
AWS Storage Gateway	41
AWS Import/Export.....	41
Amazon CloudFront	41

DATABASE	42
Amazon Relational Database Service (Amazon RDS).....	42
Amazon DynamoDB	42
Amazon ElastiCache	43
Amazon Redshift	43
ANALYTICS.....	44
Amazon Elastic MapReduce (Amazon EMR)	44
Amazon Kinesis	44
AWS Data Pipeline	44
APPLICATION SERVICES.....	45
Amazon AppStream	45
SDKs.....	46
Amazon Simple Queue Service (Amazon SQS).....	46
Amazon Simple Notification Service (Amazon SNS)	46
Amazon Simple Workflow Service (Amazon SWF).....	46
Amazon Simple Email Service (Amazon SES)	47
Amazon CloudSearch	47
Amazon Elastic Transcoder	48
DEPLOYMENT AND MANAGEMENT	49
AWS Identity and Access Management (IAM).....	49
Manage IAM users and their access –	49
Manage federated users and their permissions –	50
AWS CloudTrail	50

Amazon CloudWatch.....	50
AWS Elastic Beanstalk.....	51
AWS CloudFormation.....	51
AWS OpsWorks	51
AWS CloudHSM.....	52
CREATING AN AWS ACCOUNT	52
Signing up.....	52
CHAPTER - AMAZON VIRTUAL PRIVATE CLOUD (AMAZON VPC).....	53
INTRODUCTION.....	53
AMAZON VIRTUAL PRIVATE CLOUD (AMAZON VPC).....	53
SUBNETS.....	54
ROUTE TABLES	54
INTERNET GATEWAYS	55
DYNAMIC HOST CONFIGURATION PROTOCOL (DHCP) OPTION SETS.....	56
domain-name-servers —.....	56
domain-name —.....	56
ntp-servers —	56
netbios-name-servers —	56
netbios-node-type —	56
ELASTIC IP ADDRESSES (EIPS).....	57
ELASTIC NETWORK INTERFACES (ENIS).....	57
ENDPOINTS	58
PEERING	59

SECURITY GROUPS	60
TABLE 4.4 Security Group Rules for a Web Server.....	60
NETWORK ACCESS CONTROL LISTS (ACLs)	61
TABLE 4.5 Comparison of Security Groups and Network ACLs.....	61
NETWORK ADDRESS TRANSLATION (NAT) INSTANCES AND NAT GATEWAYS	62
NAT INSTANCE	62
NAT GATEWAY	63
VIRTUAL PRIVATE GATEWAYS (VPGS), CUSTOMER GATEWAYS (CGWS), AND VIRTUAL PRIVATE NETWORKS (VPNS)	63
FIGURE 4.4 VPC with VPN connection to a customer network	64
AMAZON VPC SUMMARY.....	65
EXAM ESSENTIALS.....	67
EXERCISES.....	69
Create Two Subnets for Your Custom Amazon VPC	69
Connect Your Custom Amazon VPC to the Internet and Establish Routing	69
Launch an Amazon EC2 Instance and Test the Connection to the Internet	70
CHAPTER - IMAGES AND INSTANCES	71
INTRODUCING EC2!.....	71
EC2 USE CASES	71
Hosting environments:	71
Dev/Test environments:	71
Backup and disaster recovery:	71
Marketing and advertisements:	71
High Performance Computing (HPC):	71

INTRODUCING IMAGES AND INSTANCES.....	72
UNDERSTANDING IMAGES.....	72
• EBS-backed AMI:	73
• Instance store-backed AMI:	73
Amazon Linux AMI	75
UNDERSTANDING INSTANCES.....	75
General purpose:	75
Compute optimized:	75
Memory optimized:	76
Storage optimized:	76
GPU instances:	76
EC2 INSTANCE PRICING OPTIONS	76
ON-DEMAND INSTANCES.....	76
RESERVED INSTANCES.....	77
SPOT INSTANCES.....	77
WORKING WITH INSTANCES	77
STAGE 1 – CHOOSE AMI	79
STAGE 2 – CHOOSE AN INSTANCE TYPE.....	80
STAGE 3 – CONFIGURE INSTANCE DETAILS.....	81
• Number of instances:	81
• Purchasing option:	81
• Network:	82
• Subnet:	82

• Auto-assign Public IP:	83
• IAM role:	83
• Shutdown behaviour:	83
• Enable termination protection:	83
• Monitoring:	83
• Tenancy:	83
STAGE 4 – ADD STORAGE	83
STAGE 5 – TAG INSTANCES	84
STAGE 6 – CONFIGURE SECURITY GROUPS	85
STAGE 7 – REVIEW INSTANCE LAUNCH	86
CONNECTING TO YOUR INSTANCE	87
USING YOUR WEB BROWSER:	88
USING PUTTY	91
USING SSH	95
CONFIGURING YOUR INSTANCES	96
LAUNCHING INSTANCES USING THE AWS CLI	99
STAGE 1 – CREATE A KEY PAIR	99
STAGE 2 – CREATE A SECURITY GROUP	99
STAGE 3 – ADD RULES TO YOUR SECURITY GROUP	100
STAGE 4 – LAUNCH THE INSTANCE	101
CLEANING UP!	101
PLANNING YOUR NEXT STEPS	103
RECOMMENDATIONS AND BEST PRACTICES	104

CHAPTER - BUILDING YOUR OWN PRIVATE CLOUDS USING AMAZON VPC	105
VPC CONCEPTS AND TERMINOLOGIES	106
Subnets	106
Security groups and network ACLs	107
Routing tables	107
VPC endpoints.....	108
Internet Gateways	110
NAT instances.....	110
DNS and DHCP Option Sets.....	112
Domain Name Servers (DNS)	112
Domain name.....	112
• NTP servers:	113
WORKING WITH VPCS.....	113
VPC LIMITS AND COSTS.....	113
VPC DEPLOYMENT SCENARIOS	113
VPC with a single public subnet	114
VPC with public and private subnets (NAT)	114
VPC with public and private subnets and hardware VPN access.....	114
VPC with a private subnet only and hardware VPN access	114
GETTING STARTED WITH THE VPC WIZARD.....	115
FILL IN THE FOLLOWING DETAILS AS REQUIRED:.....	117
• IP CIDR block:	117
• VPC name:	117

• Public subnet:.....	117
• Availability Zone:.....	117
• Public subnet name:.....	117
• Private subnet, Availability zone, Private subnet name:	118
• Instance type:.....	118
• Key pair name:	119
• Subnet:	119
• Policy:	120
• Enable DNS hostnames:	120
• Hardware tenancy:.....	120
Viewing VPCs.....	121
Listing out subnets	122
Working with route tables	124
Listing Internet Gateways	125
Working with security groups and Network ACLs	126
LAUNCHING INSTANCES IN YOUR VPC.....	131
CREATING THE WEB SERVERS	131
CREATING THE DATABASE SERVERS	133
PLANNING NEXT STEPS	133
BEST PRACTICES AND RECOMMENDATIONS	136
CHAPTER - MONITORING YOUR AWS INFRASTRUCTURE	137
AN OVERVIEW OF AMAZON CLOUDWATCH.....	137
CONCEPTS AND TERMINOLOGIES.....	137

METRICS	137
NAMESPACES	138
DIMENSIONS	138
TIME STAMPS AND PERIODS.....	138
UNITS AND STATISTICS.....	139
ALARMS.....	140
CLOUDWATCH LIMITS AND COSTS	141
GETTING STARTED WITH CLOUDWATCH.....	142
MONITORING YOUR ACCOUNT'S ESTIMATE CHARGES USING CLOUDWATCH	142
• Whenever this alarm:	145
° State is ALARM:.....	145
° State is OK:.....	145
° State is INSUFFICIENT:	145
• Send notification to:	145
MONITORING YOUR INSTANCE'S CPU UTILIZATION USING CLOUDWATCH.....	147
• Notification:	150
• AutoScaling Action:	150
• EC2 Action:	151
MONITORING YOUR INSTANCE'S MEMORY AND DISK UTILIZATION USING CLOUDWATCH SCRIPTS.....	153
CREATING CLOUDWATCH ACCESS ROLES	153
INSTALLING THE CLOUDWATCH MONITORING SCRIPTS	154
• CloudWatchClient.pm:	155
• mon-put-instance-data.pl:	155

• mon-get-instance-stats.pl:	155
• awscreds.template:	156
VIEWING THE CUSTOM METRICS FROM CLOUDWATCH	157
MONITORING LOGS USING CLOUDWATCH LOGS.....	158
CLOUDWATCH LOG CONCEPTS AND TERMINOLOGIES	159
• Log events:	159
• Log groups:	159
• Metric filters:	159
• Retention policies:	159
• Log agent:	159
GETTING STARTED WITH CLOUDWATCH LOGS	159
Here's a quick look at the awslogs.conf file's parameters:.....	161
• file:.....	161
• datetime_format:.....	162
• Initial_position:	162
• log_group_name:	162
• log_stream_name:	162
VIEWING THE LOGS.....	162
CREATING METRIC FILTERS AND ALARMS	163
PLANNING YOUR NEXT STEPS	166
RECOMMENDATIONS AND BEST PRACTICES	166
CHAPTER - WORKING WITH SIMPLE STORAGE SERVICE.....	167
INTRODUCING AMAZON S3	167

FEW BUCKET RULES:	167
• Standard:	167
• Standard_IA:	168
• Glacier:	168
• Reduced Redundancy Storage (RRS):	168
GETTING STARTED WITH S3	168
CREATING BUCKETS	169
UPLOADING YOUR FIRST OBJECT TO A BUCKET	171
• Key:	171
• Value:	171
• Version ID:	171
• Metadata:	171
• Sub resources:	171
• Access control:	172
VIEWING UPLOADED OBJECTS	174
ACCESSING BUCKETS AND OBJECTS USING S3CMD	174
MANAGING AN OBJECT'S AND BUCKET'S PERMISSIONS	177
• Resource-based policies:	177
• Bucket policies:	177
USING BUCKETS TO HOST YOUR WEBSITES	182
S3 EVENTS AND NOTIFICATION	184
• Object created:	184
• Objects removed:	184

- **Object lost:**..... 184
- THE PARAMETERS ARE AS FOLLOWS: 185
 - **Name:**..... 185
 - **Events:**..... 185
 - **Prefix:** 185
 - **Suffix:** 185
 - **Send To:** 186
 - **SNS topic:** 186
- BUCKET VERSIONING AND LIFECYCLE MANAGEMENT 187
- CROSS-REGION REPLICATION 190
- PLANNING YOUR NEXT STEPS 192
- RECOMMENDATIONS AND BEST PRACTICES 193
- CHAPTER - DATABASE-AS-A-SERVICE USING AMAZON RDS 194
 - AN OVERVIEW OF AMAZON RDS 194
 - RDS INSTANCE TYPES 195
 - **Micro instances (db.t1.micro):**..... 195
 - **Standard instances (db.m3):** 196
 - **Memory optimized (db.r3):**..... 196
 - **Burst capable (db.t2):**..... 196
 - Here's a quick look at the different storage types provided with your RDS instances:** 196
 - **Magnetic (standard):**..... 196
 - **General purpose (SSD):** 197
 - **Provisioned IOPs:**..... 197

MULTI-AZ DEPLOYMENTS AND READ REPLICAS	197
WORKING WITH AMAZON RDS.....	200
GETTING STARTED WITH MYSQL ON AMAZON RDS.....	201
CREATING A MYSQL DB INSTANCE.....	202
Step 1: Select Engine	203
Step 2: Production?.....	203
Step 3: Specify DB Details	204
• License Model:	204
• DB Engine Version:	204
• DB Instance Class:	205
• Multi-AZ Deployment:	205
• Storage type:	205
• Allocate storage:	205
Settings panel:	206
• DB Instance Identifier:	206
• Master Username:	206
• Master Password:	206
Step 4: Configure Advanced Settings	206
• VPC:	206
• Subnet Group:	206
• Publicly Accessible:	207
• Security Group(s):	207
Database Options:.....	207

• Database Name:	207
• Database Port:	208
• DB Parameter Group:	208
• Option Group:	208
• Enable Encryption:	209
Some of the states that a DB instance goes through during its lifecycle:	211
• Creating:	211
• Modifying:	211
• Backing-up:	211
• Available:	211
CONNECTING REMOTELY TO YOUR DB INSTANCE	212
TESTING YOUR DATABASE	213
MODIFYING YOUR DB INSTANCES	214
BACKING UP DB INSTANCES.....	215
• Automated backup:	215
• DB snapshots:	216
CREATING READ REPLICAS AND PROMOTING THEM	217
LOGGING AND MONITORING YOUR DB INSTANCE.....	220
CLEANING UP YOUR DB INSTANCES	223
PLANNING YOUR NEXT STEPS	224
RECOMMENDATIONS AND BEST PRACTICES	224
CHAPTER - EXTENDED AWS SERVICES FOR YOUR APPLICATIONS	225
INTRODUCING AMAZON ROUTE53.....	225

WORKING WITH ROUTE53	225
CREATING HOSTED ZONES	226
• A record:	227
• AAAA record:	228
• CNAME records: A Canonical Name (CNAME)	228
• MX records:	228
• Simple routing:	228
• Weighted routing:	228
• Latency-based routing:	229
• Geolocation routing:	229
• Failover routing:	229
GETTING STARTED WITH TRAFFIC FLOW	231
• ELB:	231
• Amazon S3 bucket:	231
• CloudFront distribution:	231
CONFIGURING HEALTH CHECKS.....	232
CONTENT DELIVERY USING AMAZON CLOUDFRONT.....	235
GETTING STARTED WITH DISTRIBUTIONS.....	236
• Web:	236
• RTMP:	236
• RTMP:.....	237
• RTMPT	237
• RTMPE	237

• RTMPTE	237
• Origin Domain Name:.....	237
• Restrict Bucket Access:.....	237
• Origin Access Identity:.....	237
• Grant Read Permissions on Bucket:	238
• Restrict Viewer Access:	238
• Price Class:.....	239
• Alternate Domain Names (CNAMEs):	239
• Logging:	239
• Distribution State:	240
CLOUDFRONT RECOMMENDATIONS AND BEST PRACTICES.....	240
WHAT'S NEW IN AWS?.....	242
ELASTIC CONTAINER SERVICE	242
• Automated Clustering:	242
• Container Scheduling:	243
• Portability and extensibility:	243
• AWS integration:	243
ELASTIC FILE SYSTEM	243
DATABASE MIGRATION MADE EASY WITH DATABASE MIGRATION SERVICE	245
GO SERVERLESS WITH AWS LAMBDA	245
CHAPTER - TEN WAYS TO DEPLOY AWS QUICKLY	246
RESEARCHING AWS INTERACTIVITY WITH THIRD-PARTY PRODUCTS.....	246
DEVELOPING A PLAN FOR SENSITIVE DATA	246

USE TOOLS TO ENHANCE PRODUCTIVITY	246
» Built-in:.....	246
» Third party:.....	246
» Developer:.....	246
CHOOSING THE RIGHT SERVICE	247
ENSURING THAT YOUR PLAN CONSIDERS LOSS OF CONTROL.....	247
LOOKING FOR ALL-IN-ONE SOLUTIONS THAT AREN'T	247
SPENDING FREE TIME WHERE YOU NEED IT MOST	248
WORKING WITH TEMPLATES	248
DISCOVERING IMPLIED THIRD-PARTY USE.....	248
CHAPTER - TEN MUST-HAVE AWS SOFTWARE PACKAGES	249
USING THE CONSOLE INTERNET TOOLS.....	249
USING THE COMMAND LINE INTERFACE (CLI) TO INSTALL PACKAGES	249
CHANGING CONFIGURATION USING COMMAND LINE EDITORS	251
CHECKING SYSTEM PERFORMANCE.....	251
WORKING AT THE SYSTEM LEVEL	252
MAKING CLOUD MANAGEMENT EASIER WITH CLOUDMGR	255
» CloudMGR Business:	255
» CloudMGR for Autotask:	255
» CloudMGR for cPanel Web Host Manager Complete Solution (WHMCS):.....	255
GOING OUTSIDE THE MARKETPLACE WITH ENSTRATIUS	255
MANAGING AND SCALING YOUR APPS USING HEROKU.....	256
PERFORMING BROWSER-BASED MANAGEMENT USING HYBRIDFOX.....	257

GETTING A COMPLETE MANAGEMENT PACKAGE WITH RIGHTSCALE	257
EMPLOYING POLICY-BASED MANAGEMENT WITH SCALR.....	257
PLANNING YOUR NEXT STEPS	258
RESOURCES, RECOMMENDATIONS, AND BEST PRACTICES	258
AMAZON WEB SERVICES SCREEN SHOTS.....	260
ALTERNATIVE WEB SERVICES PROVIDERS	261
THE DIFFERENCE BETWEEN AWS, AZURE, GOOGLE CLOUD AND OPENSTACK TABLE	262
A FEW EXAMPLE OF COMPANIES AND ORGANIZATIONS RUNNING WEB SERVICES	263
AWS.....	263
GOOGLE CLOUD PLATFORM	263
MICROSOFT AZURE	263
CLOUD SERVICES COMPARISON TABLE	264
REFERENCES.....	265
